Upcoming budget

Tue 2011/07/12 9:58 PM

Herewith my priorities

1. Cut back military and other false security expenditures including substituting coast guard icebreakers and helicopters for submarines and useless fighter planes. Back as far away as possible from any further NATO aggressions against civilians and public infrastructures. This should save billions!
2. Introduce targeted tax increases a-la-gas taxes and divert the extra revenue towards supporting building sustainable energy, agricultural and food industries.
3. Encourage (with direct funding, tax breaks, logistical support or other means) Canadian individuals, NGO's and businesses to engage in overseas volunteer activities, especially in areas affected by environmental disasters or other events involving the mass movement of people from their traditional living areas.

" The earth is my turf"
