Subject: request letter of EBOV & NiV

Dear Professor QIU:

Thank you very much for providing us with your continued and generous support and assistance with regard to the introduction of EBOV and NiV!

As per the content of our previous exchanges, my organization has drafted a request letter and a biosafety statement in accordance with the matters that were discussed previously. Please review the attached electronic versions. Would this satisfy the request from your organization?

Please feel free to contact us at any time if you have any questions or if there is anything that we can do!

All the best,

Third party [redacted]
